PROGRAMME PROJECT REPORT FOR BACHELOR OF EDUCATION (B. Ed.)

a) PROGRAMME MISSION AND OBJECTIVES

Mission

Teaching is a profession for which aspirants have to be prepared through rigorous education and training. It is often emphasized that the teachers need to be prepared through effective pre-service, followed by periodical in- service teacher education, to develop and update them in the necessary knowledge, skills, attitudes and values. Being an in service teachers having experience in this profession for some time. You must have experienced many problems and questions must have risen in your mind. This programme will help to solve those problems in a better manner and try to answer those questions. Besides, this programme will strive to confirm your ideas, provide coherence to your thinking, ratify your practices and further sharpen your perspective in education.

Programme Objectives

- To understand the importance of philosophical sociological and cultural aspects of Education.
- To apply the principles of learning and teaching in Education.
- To foster all- round growth and development of the students.
- To organize the Skills of teaching experiences on teaching different school subjects.
- To develop problem solving behaviors in Education.
- To understand the role of home, school and community in shaping the personality of the learner, and develop an amicable home-school relationship for mutual benefit.
- To undertake investigatory projects and action research to improve the system.

b) RELEVANCE OF THE PROGRAMME WITH HEI'S MISSION AND GOALS

In parallel with technological advances in today's world of education activities can be conducted without the constraints of time and space. One of the most important of these activities is distance education. The B.Ed. programme through Distance Mode of Alagappa University is offered by the Directorate of Distance Education. This programme is designed specifically for in- service teachers who wish to enhance their teaching skills and techniques.

The Directorate of Distance Education of the University has a team of well qualified and experienced teachers. They are available for academic counseling, guidance and help. Thus the introduction of B.Ed. Programme in the Directorate of Distance Education will contribute substantially in fulfilling the mission of Alagappa University.

c) NATURE OF PROSPECTIVE TARGET GROUP OF LEARNERS

This programme is meant to systematize and give a method and structure to learner experiences. Specifically, this programme aims at enhancing the professional competencies and skills of the teachers working in elementary, secondary and higher secondary schools. The target groups are trained in-service teachers.

d) APPROPRIATENESS OF PROGRAMME

B.Ed. Distance Education Programme provides opportunities for the ‘in-service’ teachers to understand the latest trends in teaching and learning process. It also helps to understand the psychological principles of growth and development, individual differences and cognitive, psychomotor and attitudinal learning. It enables the in-service teachers to develop their skills in identifying, selecting, innovating and organizing learning experiences for teaching school subjects.

KARAIKUDI- 630 003

B.Sc MATHEMATICS
Choice Based Credit System (CBCS)
(With effect from June 2018 – 2019 onwards)

a. Programme's Mission & Objectives:

To afford a High Quality Under Graduate Degree (B.Sc) Mathematics through Distance Learning mode to the students in order to nurture them in the emerging society among the young minds.

The general objectives of the programme is to:

- Give an expanded knowledge about Mathematics.
- Know and demonstrate understanding of the concepts from the five branches of mathematics (number, algebra, geometry and trigonometry, statistics and probability, and discrete mathematics)
- Use appropriate mathematical concepts and skills to solve problems in both familiar and unfamiliar situations including those in real-life contexts
- Select and apply general rules correctly to solve problems including those in real-life contexts.

b. Relevance of the Programme with Alagappa University's Mission and Goals:

In order to align with the mission and goals of Alagappa University the B.Sc Mathematics is planned to deliver in Distance Learning mode which may reach the maximum number of student aspirants who are unable to thrive to spend non-elastic timings of formal conventional class room education. Such an undergraduate education in Mathematics subject with appropriate practical experiences will enrich the human resources for the uplift of the nation to Educational, Social, Technological, Environmental and Economic Magnificence (ESTEEM).

c. Nature of Prospective Target Group of Learners:

The curriculum has been designed for the learners including a class having of low level of disposable income, rural dwellers, women, unskilled men, minorities etc. to apply mathematical knowledge and problem-solving techniques to investigate a problem, generate and/or analyse information, find relationships and patterns, describe these mathematically as general rules, and justify or prove them through Distance Learning mode. Especially this curriculum will helpful to the learners, who are as workers in shops, factories and house wives etc.

d. Appropriateness of programme to be conducted in Distance learning mode to acquire specific skills and competence:

B.Sc Mathematics programme through Distance Learning mode is developed in order to give subject-specific skills including to:

- recognize that mathematics permeates the world around us
- appreciate the usefulness, power and beauty of mathematics
- enjoy mathematics and develop patience and persistence when solving problems
- understand and be able to use the language, symbols and notation of mathematics
- develop mathematical curiosity and use inductive and deductive reasoning when solving problems
- become confident in using mathematics to analyse and solve problems both in school and in real-life situations
- develop the knowledge, skills and attitudes necessary to pursue further studies in mathematics
- develop abstract, logical and critical thinking and the ability to reflect critically upon their work and the work of others
- develop a critical appreciation of the use of information and communication technology in mathematics
- appreciate the international dimension of mathematics and its multicultural and historical perspectives.

The programme is developed to give the students to encourage to share their thinking with teachers and peers and to examine different problem-solving strategies. Critical reflection in mathematics helps students gain insight into their strengths and weaknesses as learners and to appreciate the value of errors as powerful motivators to enhance learning and understanding.

At the end of the Programme students should be able to:

- Explain whether their results make sense in the context of the problem
- Explain the importance of their findings
- Justify the degree of accuracy of their results where appropriate
- Suggest improvements to the method when necessary.
